UNBRICKED

— A NEW WAY OF SCHOOL —

LIVE YOUR LIFE THE WAY YOU IMAGINE IT AND OFFER YOUR CHILDREN AN EDUCATION THAT THEY DESERVE.

IS THIS YOU?

PARENT WHO PREFERS HOMESCHOOLING

You are not a fan of state school systems and would like to homeschool your children but **lack time and resources**? No problem, we offer your children the education they deserve. If you're unsure if homeschooling is possible in your situation, then please write to us. We'd be happy to advise you.

FREQUENT TRAVELER

You are always on the go, whether it's for work or because you simply love to travel. At the same time, **you want to see your children grow up and spend time with them**. We enable you to combine both. Live your life the way you want, enjoy time with your children and offer them the education they deserve.

SEPARATED FAMILY

You are separated from the other parent, you share custody, and your children spend longer periods of time with each parent. **You don't want to subject your children to constant school changes**? UNBRICKED makes it easy for your children's school to come along, whether they are with Mom or Dad.

OUR STORY

We declare the state school systems to be bankrupt and turn the concept of "school" upside down. The antiquated idea of school is very dangerous because it will not prepare your child for a future that we can only imagine inadequately today. A future with jobs that do not even exist yet.

OUR VISION

Live your life the way you want to, and offer your children an exceptional education outside the state school system. You don't have to subject your life to the narrow dictates of traditional schooling with which we grew up. At UNBRICKED, we aim to provide people with an option to forego all the restrictions that come with the state school system, while simultaneously offering their children a truly modern education.

OUR MISSION

We want tomorrow to belong to our students. We prepare them for that. UNBRICKED is so much more than just a school. We live, love, research, learn, discover, experiment, celebrate, and study together. Our teachers and students are real partners who respect each other and believe in bringing out the best in each other.

OUR CONCEPT

PREPARING FOR LIFE, NOT JUST FOR EXAMS

We prepare your child for an excellent graduation. For life and for their career, whatever it may look like for your child. Entrepreneurship and finance, new media and artificial intelligence, technology, and research in all areas. We respond quickly and provide the tools your child needs to be equipped for the future. That's why we have "Open Studies" every Thursday. Cross-class project work based on your child's interests and abilities. Because education is the ticket to the future.

INDIVIDUAL SUPPORT

We are dedicated to promoting your child's individual development. Through our small classes and pedagogical approach, we ensure that your child develops in the best possible way and is supported and challenged according to their abilities and interests.

Is your child a math genius who leaves every teacher in the dust? No problem, we open the Math Expert Playground for your child. Is your child artistically gifted? We ensure a stress-free school graduation where there is still plenty of time and space for your child's artistic development.

CLASSES IN ENGLISH

Our world is international, just like our students. The best preparation for a future with a high level of language proficiency is our English-taught classes. Even children who do not speak English well can easily adapt to the language within the first few months.

Since English is the natural language environment for our students, it feels almost like learning a second native language for your child. And without evaluation, any pressure for success in traditional language instruction disappears naturally.

MAXIMUM 8 STUDENTS PER CLASS

The maximum class size is eight students. This ensures that the learning companions can really keep a close eye on every child and that each student receives sufficient attention and time for questions, reflection, and feedback.

Every Thursday we dissolve the classes and the students have the opportunity to work on projects across classes in the "Open Studies".

OUR CONCEPT

DEEP DIVES

The classes take place online. Therefore, our deep dives are very important to us. Twice a year, our students, and learning guides meet at a central location in Europe, explore different cultures, learn new languages, and enjoy the offline time together. They engage in cultural activities, sports, and much more. (secondary school only)

NOT JUST TEACHERS

Our teachers are learning guides because they do not only teach, but also accompany your child through all the experiences related to independent learning. Traditional "cramming" is not part of our approach. We rely on a mix of educators and experts, individually selected according to what the class currently needs.

OUR SCHOOL YEAR

1

TRIMESTER

from the first Monday in September until Christmas

2

TRIMESTER

second week of January until one week before Easter

3

TRIMESTER

One week after Easter until mid-July

CONCEPT DETAILS

DEEP DIVES

Twice a year, our students gather at a thrilling spot in Europe or worldwide to build stronger relationships with one another and explore various topics from science, art, sports, health, and economics in greater detail.

In the process, they also gain exposure to other languages and cultures. This fosters deep connections worldwide, resulting in an international community that remains helpful and supportive of each other long after leaving school.

Participation is voluntary, but meaningful and highly recommended. On request, we organize a travel companion for the students (costs not included).

The deep dives can also take place in a location with a different time zone.

ABOUT OUR CLASSES, TEACHERS AND EXPERTS

The language of instruction is English. Students who do not yet speak sufficient English are given special support in the first 3 months to comprehend and speak English. This takes place without the pressure of grades, and the students learn English almost like a second mother tongue.

Each class has two class teachers. One is responsible for the science subjects, the other for social studies and languages. Each teacher teaches interdisciplinary subjects.

The goal is for the class to make sense of its curriculum individually. Until the class is able to do this, two days/week are devoted to social studies and two days to science.

As the students develop and the curriculum evolves, science may be taught for 3 weeks at a time, for example, if that makes sense or if the class is taught one subject particularly intensively, such as a language.

In project schools in Northern Europe (Sweden, Finland, etc.) this system has achieved very good learning results with less time spent and has brought back the joy of learning in the students. The class teachers are certified teachers with at least C1 level in English.

CONCEPT DETAILS

OPEN STUDIES

Our Open Studies take place every Thursday. Open Studies are class-wide project days on which students can choose from a range of activities that go beyond the school curriculum.

They are also allowed to think up their own projects, for which they are responsible for organizing.

Open Studies are led by teachers and, above all, by experts from the worlds of business, science, art, culture, sports, and research. During Open Studies, students are allowed to work on any topic that interests them and to integrate this into the rest of their school day. This also includes other languages.

PREPARATION FOR GRADUATION

In some countries, it is necessary for homeschooling students to prove their performance level once a year or to take an external exam. For these students, we develop a curriculum adapted to the country and the possibility to document the performance and evidence online.

Within this framework, it is also possible – on request, to write appropriate written examinations or to take examinations (written and oral) during the school year. We are happy to help with researching the regulations of the country in question.

Currently, we prepare our students for all qualifications (after 10th or 12th grade) of the German and British school systems. The British A-Levels and German Abitur qualifications enable students to attend international universities.

It is not necessary to have lived or attended school in the country to take the exams. We will be adding degrees from other countries over time. If you are interested in a certificate for a specific country, we will be happy to assist with the research of the conditions.

PRIMARY SCHOOL DAY

OPEN START

9:15 - 9:30 AM

CLASS

9:30 - 10:30 AM - focussed work without interruptions

BREAK AND TIME FOR SELF-STUDY
